About Me

Results-oriented SAP Certified Commerce Cloud Developer with 9 years of experience in designing, implementing, and customizing e-commerce solutions. Skilled in analyzing business requirements, identifying system enhancements, and delivering high-quality software solutions. Proficient in leveraging the power of SAP Commerce Cloud platform to design, develop, and implement robust and scalable online stores for global clients. Adept at collaborating with cross-functional teams to achieve project objectives and ensure seamless integration with existing systems. Proven track record of delivering successful SAP Commerce Cloud implementations, upgrades, and cloud (CCv2) migrations for clients across various industries. Possesses excellent problem-solving abilities and a strong commitment to delivering exceptional customer satisfaction. Strong knowledge of SAP Commerce Cloud, Java, Spring, and web technologies. Committed to staying updated with the latest industry trends and best practices to drive continuous improvement and innovation.

Professional Summary

- Rich development experience in SAP Commerce Cloud modules **Data modelling, Accelerators, Catalog Management, OCC, Order Management, Cart and Checkout, Search and Navigation, WCMS, Cronjobs, Impex, Flexible Search Query, Web Services, Backend Administration, Business Processes, Events & Listeners, Integration APIs,**
- Skilled in SAP Commerce Cloud **upgrades** and **cloud (CCv2) migrations**, ensuring smooth transitions and system enhancements.
- Extensive experience in seamless integration with SAP ERP and various third-party backend systems, utilizing **webMethods**, **apigee**, **Akana**, and **MuleSoft** as robust middleware layers.
- Proficient in **Agile** development methodologies, actively participating in all Agile ceremonies and seamlessly operating within sprint cycles, ensuring efficient project management and timely delivery of high-quality software solutions.
- Highly skilled in performing **requirement analysis, solution design** and **development**.
- Hands on development experience of **Spring MVC design pattern**.
- Sound knowledge of frontend technologies like **HTML**, **Bootstrap**, **JavaScript**, **CSS**.
- Experienced using tools such as **IntelliJ IDEA, Eclipse, SonarQube, SourceTree, Amazon S3, Git, GitHub Actions, Azure Storage Explorer, HashiCorp Vault.**
- Possessing extensive experience in managing **HsqlDB**, **Oracle**, **MySQL**, **SAP HANA** and **MSSql** databases seamlessly integrated with the SAP Commerce platform.
- Experience using Atlassian products like **Confluence, JIRA, Bitbucket** and **Azure DevOps**.
- Hands on experience of integrating **REST** & **SOAP** web services.
- Working knowledge of using various services in **AWS** and hands on experience on different Cloud providers.

Awards & Achievements

- Always striving, never settling – Cognizant, January 2021.
- Working as One – Cognizant, December 2020.
- Spot Light Award – Cognizant, June 2019.
- Milestone Award, 3 years – Sonata Software, August 2017.
- Nominated for Innovation and Process Excellence Award – Sonata Software, December 2016.
- Quarterly award for Customer and Business Excellence – Sonata Software, January 2016.
- DNA Award, Run for It – Sonata Software, September 2015.
- DNA Award, Everyone Counts – Sonata Software, August 2015.
- Best Outgoing Student – Acharya Institute of Technology, May 2014.

Work Experience

Technical Lead
Cognizant Technology Solutions | Toronto, Canada

Apr 2018 - Present

Currently associated with **Cognizant Technology Solutions Canada Inc.** as **Technical Lead** working for multiple clients across domains.

- Analyze business requirements and translate them into technical solutions using SAP Commerce Cloud. Collaborate with stakeholders to understand their needs and provide recommendations for system architecture and design.
- Engaged in project discovery and gap analysis sessions with clients to identify project requirements and objectives.
- Develop and customize SAP Commerce Cloud extensions based on functional specifications. Implement new features, enhancements, and integrations using Java, Spring, and SAP Commerce Cloud framework.
- Perform code reviews to ensure adherence to coding standards, best practices, and quality guidelines. Conduct unit testing, system integration testing, and bug fixing to maintain code quality and reliability.
- Configure and set up SAP Commerce Cloud environments, including system parameters, data models, product catalogs, pricing, promotions, and payment methods.
- Identify performance bottlenecks and optimize SAP Commerce Cloud applications for improved scalability and speed. Monitor system performance, troubleshoot issues, and implement performance tuning measures.
- Develop and maintain integrations between SAP Commerce Cloud and other systems, such as ERP, CRM, and payment gateways.
- Provide technical support and troubleshooting for SAP Commerce Cloud applications. Investigate and resolve production issues, perform root cause analysis, and implement corrective actions. Monitor system logs and proactively address potential problems.
- Create technical documentation, including design specifications, configuration guides, and deployment procedures. Share knowledge and best practices with team members and contribute to internal knowledge base.
- Stay up to date with the latest trends, features, and enhancements in SAP Commerce Cloud. Explore innovative solutions and technologies to improve development processes, efficiency, and customer experience.
- Provide technical support and troubleshooting for SAP Commerce Cloud applications. Investigate and resolve production issues, perform root cause analysis, and implement corrective actions. Monitor system logs and proactively address potential problems.
- Handled multiple platform upgrade projects from v6.x to 1808 and later versions
- Worked as project lead for end-to-end platform upgrades and cloud (CCv2) migrations for largest manufacturing client and a for a retail client.
- Initial setup (code repo, security files, static files, SSL certificates and host aliases), provisioning of new environments, build and deploying the code in CCv2 portals.
- Migrated SAP CC code from GHE to GitHub Enterprise Cloud, proficiently setting up GitHub Actions for SonarQube static code analysis, and skillfully implementing Cloud builds using Commerce Cloud APIs in the CCv2 environment.
- Worked on setting up multi-country, multi-store implementations.
- Successfully integrated with Azure AD to provide seamless single sign-on (SSO) access into backoffice/hac applications for internal users with multiple security groups.
- Setup and configured the cloud hotfolder with custom implementation to load data for multiple catalogs, orders, and accounts.

Senior Systems Analyst
Sonata Software Limited | Bengaluru, India

Aug 2014 - Mar 2018

- Collaborated with stakeholders to develop comprehensive User Stories for various modules of Hybris, ensuring a clear understanding of requirements.
- Analyzed requirements, designed and implemented solutions, leveraging Hybris capabilities effectively.
- Integrated Google Analytics, Google Tag Manager, and Google Merchant Center, enabling efficient tracking and management of website analytics and e-commerce data.
- Successfully replaced Solr with SDL Fredhopper for improved search and indexing capabilities.
- Integrated Experian QAS for Address validations, ensuring accurate and validated customer addresses.
- Customized forms and implemented jQuery and Java Validator for robust validation and enhanced user input handling.
- Leveraged WCMS components and SDL Fredhopper campaigns to personalize and customize the home page, delivering a tailored user experience.
- Developed an integration system to import product and stock data from the ERP system using SOAP web services.
- Actively involved in bug fixing, identifying and resolving issues to ensure smooth system operation.
- Replaced Exact Target (Salesforce EDM) with Emarsys (Marketing Cloud) for improved marketing campaigns.
- Contributed to the development of the Store Finder module, enhancing user experience.
- Integrated Crazy Egg tracking into Hybris, enabling efficient user behavior analysis.
- Developed custom reports in the report cockpit, providing actionable insights.
- Streamlined the checkout process by transitioning from multi-step to single-page checkout.
- Successfully integrated AfterPay payment solution, expanding payment options for customers.
- Implemented multiple wish lists, enhancing customer engagement and shopping experience.
- Performed platform upgrades from v4.7 to v5.4 (for a B2C client) and v5.5 to v6.4 (for B2B2C client)
- Understanding the current system with Endeca as search solution. and Replacement of Endeca with Elasticsearch solution.
- Configuring the backoffice widgets, actions, and explorer tree based on business requirements
